- Facility/Infrastructure Attack
- Unknown
- Hostage Taking (Kidnapping)
- Unarmed Assault
- Hostage Taking (Barricade Incident)

#### **4. Software Improvements:-**

There are lots of improvements in this project code. As the client selects any option from the dropdowns like Region, Country, State, City. All these 4 dropdowns are interlinked to each other, so if any one is not selected the remaining will not show up any values. Similarly the Month and Date dropdowns are interlinked to each other, so if the month is not selected then the dates will not show up.

#### **5. Conclusion and Future Work:-**

The conclusion of the project “TERRORISM ANALYSIS WITH INSIGHTS” successfully meets all the client’s requirements and is ready to be handed over to the client for use.

Future Work includes the implementation of CSS for designing the background and user interface for the better look of the web page.

#### **6. Acknowledgements:-**

I thank Dr. Sylvester Fernandes and Mr. Yogendra Singh for their support and time in this project season-5 . They have helped us a lot in this project . They have taught us how to tackle the problem and find the solution.They have provided us the solutions also. I would again like to thank both of them.
